The path to cyber risk operational maturity

Maturity

The path

- Reactive/responsive
- Some controls in place
- IT teams responsible for cyber risk management

- Proactive/preventative
- Established control lifecycle in place
- Executive leadership responsible for cyber risk management

- Forward-looking/ incident ready
- Integration of controls into the Enterprise Risk Management framework
- Board governance and responsibility for cyber risk management

- Regular validation through testing
- Living risk management frameworks
- Organisational cyber risk management culture driven by the board
